Abridged List of Plants

OFFERED BY

GERMAIN FRUIT CO.,

Seed, Plant and Bulb Importers,

LOS ANGELES, CAL.

IN presenting this list to our patrons we would call attention to the fact that our unquestionable position as the leading Seedsmen of Southern California gives us unrivalled facilities for growing the leading varieties of Eucalypti and other Australian plants from seeds. Our Australian agents for these seeds being the most reliable firms in the Australian Colonies, there is not the slightest chance of getting substitutions.

Our new crop of Eucalypti is well established and being true to name is worthy the attention of those contemplating planting timber.

We would also call attention to our stock of Specimen Decorative Plants—all well grown and including some very rare and choice varieties. This is a leading feature of our business, and to those who wish to stock conservatories, we should be happy to make special quotations.

ADVICE TO CORRESPONDENTS.

- 1st. Make out your orders legibly on a distinct sheet, do not mix the varieties with the body of the letter.
- 2d. Give shipping instructions yourselves, then if consignment fails to reach you it is your own fault.
- 3d. Those not well acquainted with the different varieties of plants wanted had better leave the selection to us. In all cases where the selection is left to us we will endeavor, as far as possible, to send diversified varieties, of good habit.
- 4th. We decline sending goods C. O. D. unless a remittance of 50 per cent. accompanies the order to insure us against loss. Orders from unknown correspondents must be accompanied by cash or satisfactory reference.
